用go语言遍历文件夹

用 python 遍历文件夹很方便,在 go 的世界里,我也需要这样的功能。找了找文档里 面有这个功能(具体参考这里: http://golang.org/pkg/path/filepath/) ······ 好,不废话了,我也想早点睡,直接上代码。 代码如下: package main import ("path/filepath" "os" "fmt." "flag") func getFilelist(path string) string{ var strRet string err := filepath.Walk(path, func(path string, f os.FileInfo, err error) error { if (f == nil) {return err} if f.IsDir() {return nil} $strRet += path + "\r\n"$ return nil }) if err != nil { fmt.Printf("filepath.Walk() returned %v\n", err) return strRet } func main(){ flag.Parse() root := flag.Arg(0) println (getFilelist (root)) }

运行效果如下:

```
[mike@localhost dirTest]$ ./getFilelist ..
../1.go
../dirTest/dir1
../dirTest/dir1.go
../dirTest/dir2
../dirTest/dir2.go
../dirTest/dir3
../dirTest/dir3.go
../dirTest/dir4
../dirTest/dir4.go
../dirTest/getFileInf1.go
../dirTest/getFileInf2.go
../dirTest/getFilelist
../dirTest/getFilelist.go
../dirTest/test1/1.c
[mike@localhost dirTest]$
